

1. We have MVP and we're proud of it
2. We will be making significant changes to the model to simplify our logic
  - a. Group?
  - b. Request? Or some bi-directional request system. This can evolve into a messaging system.
3. We currently support 1 roommate, will expand to more
4. Discuss server restarts and how that might affect login status
5. Discuss UI and what changes, if any, are necessary.
6. Discuss possible confirmation email for additional validation
7. We will make our matching algorithm a bit smarter
8. Possibly add more preferences?
  - a. pro: more things to match on
  - b. con: more time for the user to spend
