

1. We have MVP and we're proud of it
2. We will be making significant changes to the model to simplify our logic
 - a. Group?
 - b. Request? Or some bi-directional request system. This can evolve into a messaging system.
3. We currently support 1 roommate, will expand to 4
4. We will make our matching algorithm a bit smarter
5. Possibly add more preferences?
 - a. pro: more things to match on
 - b. con: more time for the user to spend
