

1. Discuss MVP
 - 1.1. Triples/quads not in MVP- is this a problem?
 - 1.2. Request may need to be added to model
 - 1.3. Group may need to be added to model
2. Discuss API
 - 2.1. Adding all preferences upon user creation- maybe bad?
 - 2.2. Get logged in user is /user, all other operations (get all users, modify user) is /users - bad?
3. Do we change our diagrams/wireframes every time we change something?
